Course of Study Theoretical Mechanical Engineering (Study Cohort w21)

Legend			
Core Qualification Compulsory	Specialisation Compulsory	Focus Compulsory	Thesis Compulsory
Core Qualification Elective Compulsory	Specialisation Elective Compulsory	Focus Elective Compulsory	Interdisciplinary complement

Sample course plan A Master Theoretical Mechanical Engineering (TMBMS)
Specialisation Product Development and Production

LP											
1	**Finite Elements Methods**			**Numerical Treatment of Ordinary Differential Equations**			**Research Project Theoretical Mechanical Engineering**			**Master Thesis**	
2	Finite Element Methods	VL	2	Numerical Treatment of Ordinary Differential Equations	VL	2					
3	Finite Element Methods	HÜ	2	Numerical Treatment of Ordinary Differential Equations	GÜ	2					
4											
5											
6											
7	**Control Systems Theory and Design**			**Applied Dynamics: Numerical and experimental methods**							
8	Control Systems Theory and Design	VL	2	Applied Dynamics	VL	2					
9	Control Systems Theory and Design	GÜ	2	Lab Applied Dynamics	PR	3					
10											
11											
12											
13	**Modelling and Optimization in Dynamics**			**Computational Fluid Dynamics II**			**Factory Planning & Production Logistics**				
14	Flexible Multibody Systems	VL	2	Computational Fluid Dynamics II	VL	2	Factory Planning	VL	3		
15	Optimization of dynamical systems	VL	2	Computational Fluid Dynamics II	HÜ	2	Production Logistics	VL	2		
16											
17											
18											
19	**Control Lab C**			**Linear and Nonlinear System Identifikation**			**Fluidics**				
20	Control Lab VII	PR	1	Linear and Nonlinear System Identification	VL	2	Fluidics	VL	2		
21	Control Lab VIII	PR	1				Fluidics	HÜ	1		
22	Control Lab IX	PR	1				Fluidics	PBL	1		
23	**Methods of Integrated Product Development**			**Design optimization and probabilistic approaches in structural analysis**							
24	Integrated Product Development II	VL	3	Design Optimization and Probabilistic Approaches in Structural Analysis	VL	2					
25	Integrated Product Development II	PBL	2	Design Optimization and Probabilistic Approaches in Structural Analysis	HÜ	2					
26											
27											
28											
29											
30											

Business & Management (from catalogue) - 6LP

Non-technical Courses for Master (from catalogue) - 6LP

The choice of courses from the catalogue is flexible (depends on the semestral work load), provided the necessary number of required credits is reached.
