

# Course of Study Renewable Energies (Study Cohort w22)

Sample course plan A Master Renewable Energies (REMS) Dual study program

Specialisation Bioenergy Systems														
1	<b>Fluid Mechanics and Ocean Energy</b> Fluid Mechanics II VL 2 Energy from the Ocean VL 2				<b>Dimensioning and Assessment of Renewable Energy Systems (part 2)</b> Heat Provision from Renewable Sources of Energy SE 2			<b>Thermal Energy Systems</b> Thermal Energy Systems VL 3 Thermal Energy Systems HÜ 1			<b>Master thesis (dual study program)</b>			
2					<b>Use of Solar Energy</b> Solar Power Generation VL 2 Energy Meteorology VL 1 Energy Meteorology GÜ 1 Collector Technology VL 2			<b>Practical module 3 (dual study program, Master's degree)</b> Practical term 3 0						
3														
4														
5														
6														
7	<b>Electrical Power Systems I: Introduction to Electrical Power Systems</b> Electrical Power Systems I: Introduction to Electrical Power Systems VL 3 Electrical Power Systems I: Introduction to Electrical Power Systems GÜ 2				<b>System Aspects of Renewable Energies</b> Energy Trading VL 1 Energy Trading GÜ 1 Fuel Cells, Batteries, and Gas Storage: New Materials for Energy Production and Storage VL 2 Deep Geothermal Energy VL 2			<b>Examples in Solid Process Engineering</b> Fluidization Technology VL 2 Technical Applications of Particle Technology VL 2 Practical Course Fluidization Technology PR 1 Exercises in Fluidization Technology GÜ 1						
8														
9														
10														
11														
12														
13	<b>Bioenergy</b> Biofuels Process Technology VL 1 Biofuels Process Technology GÜ 1 Thermal Biomass Utilization VL 2 World Market for Commodities from Agriculture and Forestry VL 1 Thermal Biomass Utilization PR 1				<b>Modelling and Technical Design of Bio Refinery Processes</b> CAPE in Energy Engineering PK 3 Biorefineries - Technical Design and Optimization PBL 3			<b>Environmental protection management</b> Air Pollution Abatement VL 2 Health, Safety and Environmental Management IV 3						
14														
15														
16														
17														
18														
19	<b>Energy Projects - Development and Assessment</b> Development of Renewable Energy Projects VL 2 Economics of an Energy Provision from Renewables VL 1 Economics of an Energy Provision from Renewables PS 1 Renewable Energy Projects in Emerged Markets PS 2				<b>Practical module 2 (dual study program, Master's degree)</b> Practical term 2 0									
20														
21														
22														
23														
24														
25	<b>Dimensioning and Assessment of Renewable Energy Systems (part 1)</b> Electricity Generation from Renewable Sources of Energy SE 2 Environmental Technology and Energy Economics PBL 2													
26														
27														
28														
29														
30														
31	<b>Practical module 1 (dual study program, Master's degree)</b> Practical term 1 0				<b>Sustainable energy from wind and water</b> Sustainability Management VL 2 Wind Turbine Plants VL 2 Wind Energy Use - Focus Offshore VL 1 Hydro Power Use VL 1									
32														
33														
34														
35														
36														
37					<b>Waste and Energy</b> Waste Recycling Technologies VL 2 Waste Recycling Technologies GÜ 1 Waste to Energy PBL 2									
38														
39														
40														
41														
41														
Business & Management (from catalogue) - 6LP														
Linking theory and practice (dual study program, Master's degree) (from catalogue) - 6LP														

The choice of courses from the catalogue is flexible (depends on the semestral work load), provided the necessary number of required credits is reached.
